

Major Capabilities

Capability	Description
Application Software Architecture	Deep and extensive experience with designing applications to address both internal and external needs. We have very senior architects with experience in many different industries from financial to manufacturing to retail to government. The design of an application is crucially important and we can help from the earliest conceptualization, through requirements and specification to implementation management and implementation.
User Interface Architecture, Graphical Design, and Usability	Our senior user interface architects have extensive experience in user interface design and analysis. We have a proven, quantifiable, track record of improving usability for both internal and external facing applications.
Systems Implementation	We implement software applications and their user interfaces in a variety of technologies. Specific technical expertise is listed below.
User Interface Implementation	We implement user interface architectures (“web design”). Specific expertise is listed below.
SharePoint User Interface Architecture	When laying out a SharePoint site, it is important to get the user interface architecture right. Do you create sites for each Department? How do you implement document management? We have experience in helping articulate and answer these questions.

Detailed Technical Capabilities

Capability	Description
SharePoint User Interface	We can design and implement customized SharePoint user interfaces through the use of Master Pages, CSS, XSLT, JavaScript, and other technologies. We understand SharePoint UI.
SharePoint web part coding	We code custom web parts for SharePoint.
SharePoint setup and administration	Updates from 2007 to 2010, search configuration and set up including FAST Search, general configuration.

.NET Application coding	Strong ASP.NET C# implementation skills.
Client Side Interactivity (JavaScript, AJAX, Web Services)	We have extremely skilled people in the areas of interactive client side programming using JavaScript and other technologies.
PHP Coding	Strong PHP implementation skills.
FLASH/HTML5	We are skilled at building interesting client side animated and interactive visual and data enabled elements.
Content Management Systems	SharePoint, Bitrix, Drupal, WordPress, Ceonex Publishing Platform. It is the rare web site these days that doesn't require a CMS for self service by the owning organization.
Database Expertise	Extensive database experience: Oracle, SQL Server, Open databases

Company Information

Ceonex's founders are Richard Frenkel and Theodore Agranat. Richard (MS MIT) has over 30 years of experience in IT, as a technical manager, consultant, and business owner. Theodore's expertise includes 12 years of user interface design and usability. Other key members of the team include Victor Zaborov (advanced degree Applied Mathematics, Moscow State Institute) who has over 20 years of programming experience, Mikhail Karasov (advanced degree in Computer Science from Moscow State University) with 11 years of experience in user interface implementation, Dimitri Ayrapetov (CS degree from North Eastern) our SharePoint operational and administrative expert, and Eireann Kiley our primary project manager. Our depth of experience gives us insight into many business processes and needs; we can design a solution that will meet your needs, that can be built at reasonable cost, and that will be done on time and on budget. In addition to other services, Ceonex owns and operates a hosted publishing platform. Ceonex, an S-Corp, has been organized in its present form since 1998. We hold a GSA Schedule 70 contract and have an OpenRating satisfaction rating of 97% from our US Government clients.

CAGE Code:	3QEP6	DUNS #:	094648933, 038771056
Classification:	Small Business	Organization:	S-Corp (MA)
GSA Contract:	Schedule 70		

Customers and Clients

Army Corps of Engineers, New England District
696 Virginia Road
Concord, MA 01742-2751

Ceonex has been providing IT services for the Army Corps since 2003. We have built ASP.NET applications including a Help Desk (Information Management), a Visitor Registration Tracking (Logistics), Vehicle Pool Management (Logistics), and Enterprise Time and Attendance (Resource Management, this system is also in use by other Districts). These systems are integrated with Active Directory and the Corps of Engineers Financial Management System.

Ceonex architected, designed, implemented, and continues to administer and update the SharePoint Intranet for the Army Corps of Engineers, New England District. Ceonex holds a GSA contract for IT services and has an OpenRating satisfaction rating of 97% for its US Government work.

Microsoft, Inc
1290 Avenue of the Americas, Sixth Floor
New York, NY 10104
Phone: (212) 245-2100 Fax: (212) 245-3290

Ceonex architected and provided graphic design for a series of search applications to illustrate the power of FAST Search for SharePoint. We then built the first of these applications including generating content, configuring the FAST Search engine, building customized web parts and client side widgets, customizing the SharePoint user interface, and packaging the demo as an installable content pack using PowerShell administrative scripts.

Network World
492 Old Connecticut Path, Framingham, MA 01701

Ceonex has worked with NetworkWorld on a number of projects, including a usability study for their online publication, and subsequent redesign of the site, as well as providing Leadix platform services to power microsites for their sponsors. Our reference worked with us on the latter microsites both at NetworkWorld and also through Putman Media.

Client contacts furnished on request.

Berkshire Life

700 South Street, Pittsfield, MA 01201

Website design and formal usability study to create a highly usable site with planned tools for customer conversion. The original web site we built for Berkshire resulted in a tripling of traffic and doubling of inquiries. It has been in use for seven years now.

Client contacts furnished on request.
